

PHILIPUS R. NAHAK

IT INFRASTRUCTURE,
BACKEND DEVELOPER
& IT OPS

CONTACT

- +62 853-3964-4886
- rogernahak02@gmail.com
- rogernahak.github.io/my-portfolio/
- Kupang / Malaka, NTT
(Willing to relocate to Dili, Timor Leste)

SKILLS

- Linux (Debian) OS & VPS Management
- Network & Hardware Troubleshooting
- MikroTik & Bandwidth Control
- PHP, MySQL & Database Transaction
- API Integration (JSON/JWT)
- End-User IT Support
- AI Optimization Algorithms

EDUCATION

Bachelor of Informatics Engineering (S.Kom.)
STIKOM Uyelindo Kupang, Indonesia
2011 - 2015

PROFILE

IT Professional with a strong track record in server infrastructure management, backend automation system development, and IT operations support. Experienced in maintaining public institution data integrity and designing enterprise-scale system architectures. Committed to ensuring network stability (zero downtime), hardware/software troubleshooting, and integrating smart solutions for seamless business operations and enhanced company productivity.

EXPERIENCE

BAPPEDA MALAKA REGENCY

2015

Website Portal Admin & IT Staff

- Managed and ensured the accessibility and stable uptime of the government institution's website portal.
- Maintained the integrity and security of the institution's database against potential system failures or data loss.
- Provided daily technical support to staff regarding network issues, software, and hardware operations.

ENTERPRISE PROJECT (FREELANCE)

2026

Backend Developer - Smart Roster Engine

- Developed an enterprise-scale automated scheduling system using advanced AI algorithms (Min-Conflicts & Tabu Search).
- Designed code architecture with memory optimization to prevent server crashes during massive data processing.
- Secured the application ecosystem using advanced security architecture (JSON Web Token/JWT).

FREELANCE / PROJECT-BASED

2015

System Developer & AI Engineer

- Built an Automated Notification & Billing System integrated with an SMS Gateway for real-time inventory communication.

- Designed a Genetic Algorithm (AI) to create a highly efficient cost allocation and material distribution optimization system.
